Tic-Tac-Toe

Game play

Game Overview

Tic tac toe is a common played game known also as X|O game ,it plays between friends and family because it's simple, fun and its challenge side.

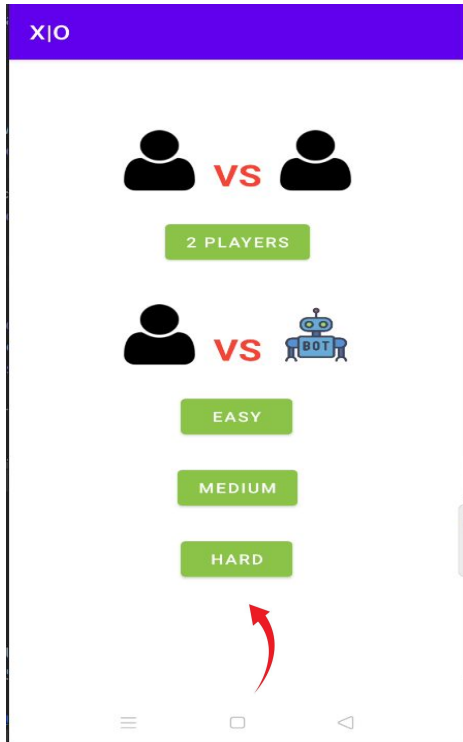

Game interface

Play button for entering the game and enjoy it.

Dashboard button to see where you 're between your friends and family by your score and number of game played.

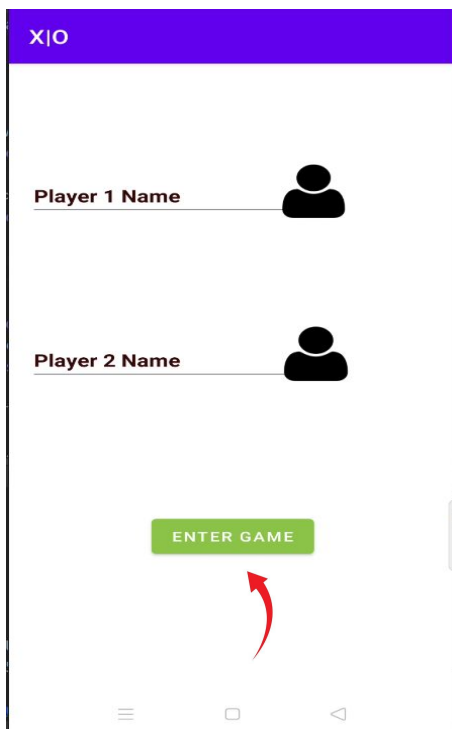

1- If Play button pressed

Game Mode:

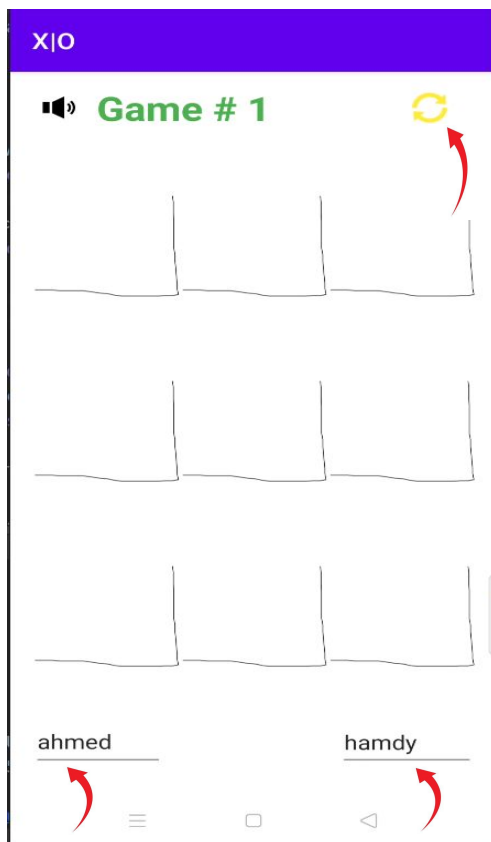

Player can play with his friends or challenge my AI by entering any level from easy - medium or hard.

If player choose to play against another player

Players can enter their names or not ,it's optional to them, but if player entered his name it will be stored automatically to the dashboard, and if player already in the dashboard his score and played games will be modified automatically.

After pressing the Enter game button

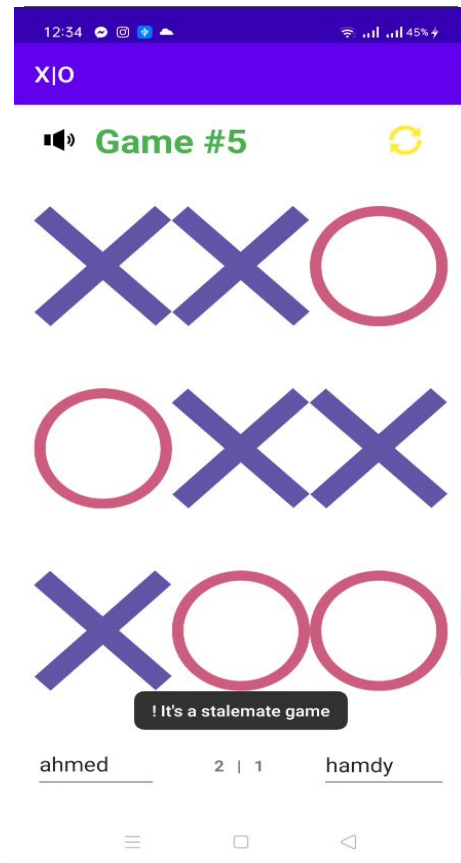

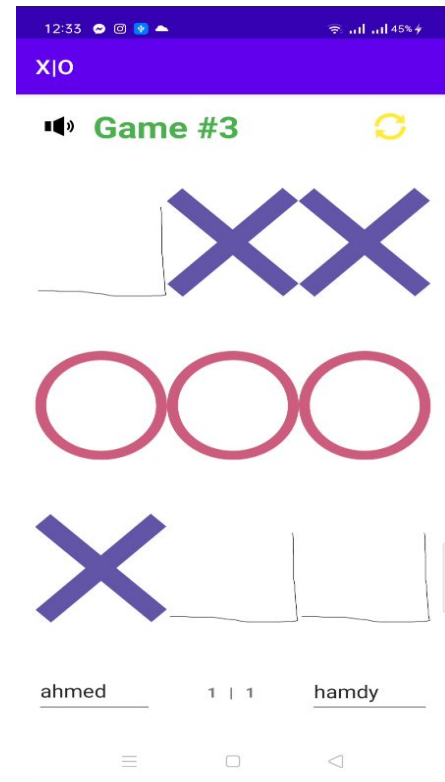

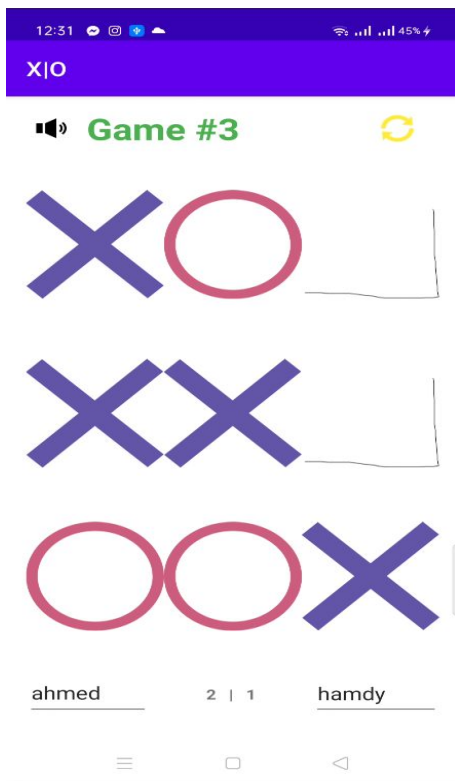

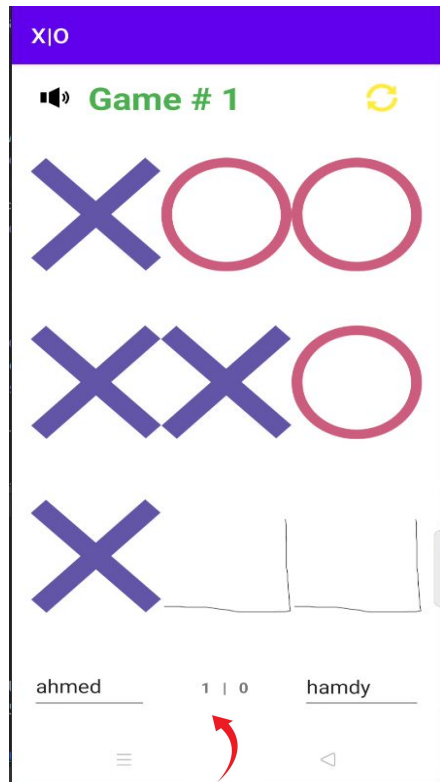

Game board simple like the X|O game that friends draw by themselves.

Player 1 is X

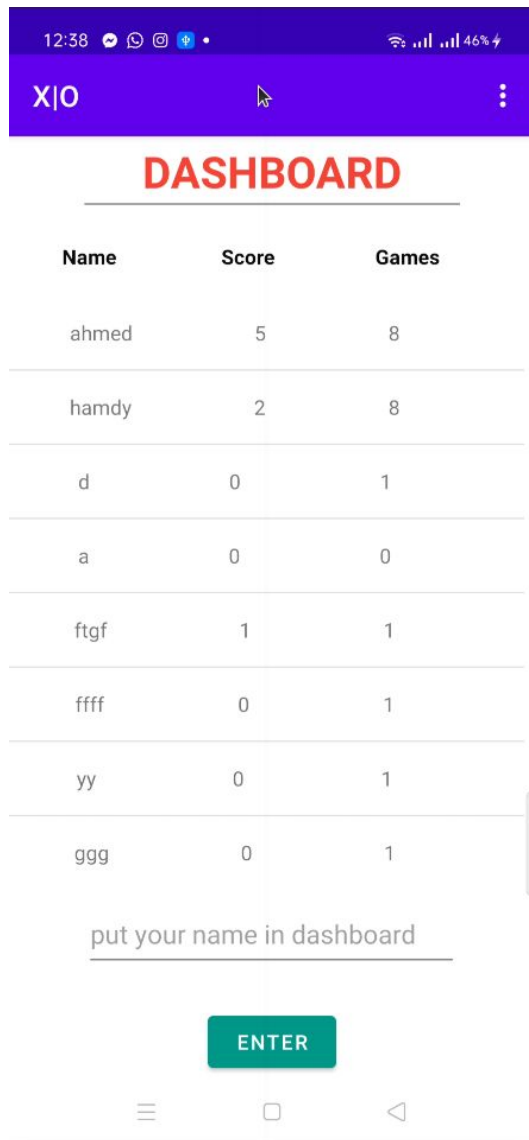

Player 2 is O

And their score shown down with the number of games that played above

If players want to play another game they can press the reload button at the top right.

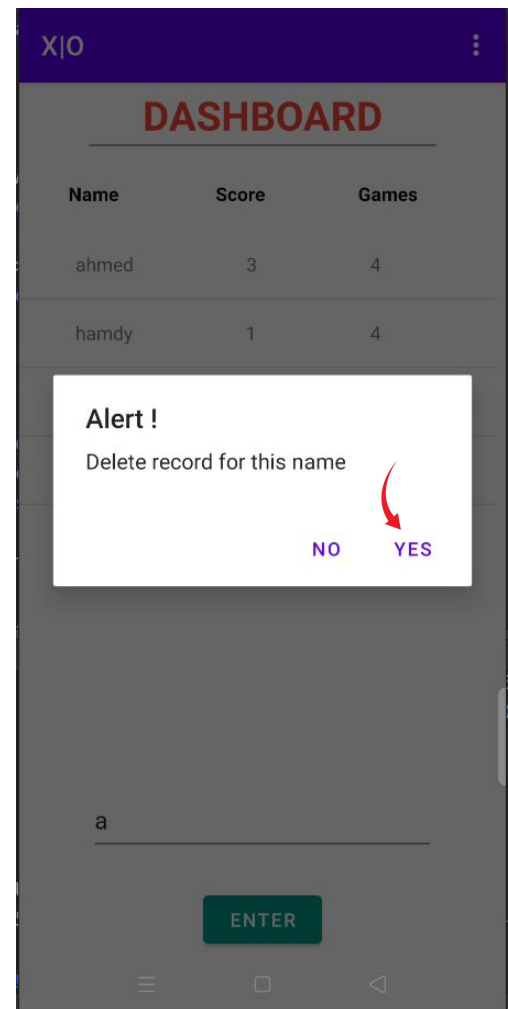

2- If Dashboard button pressed

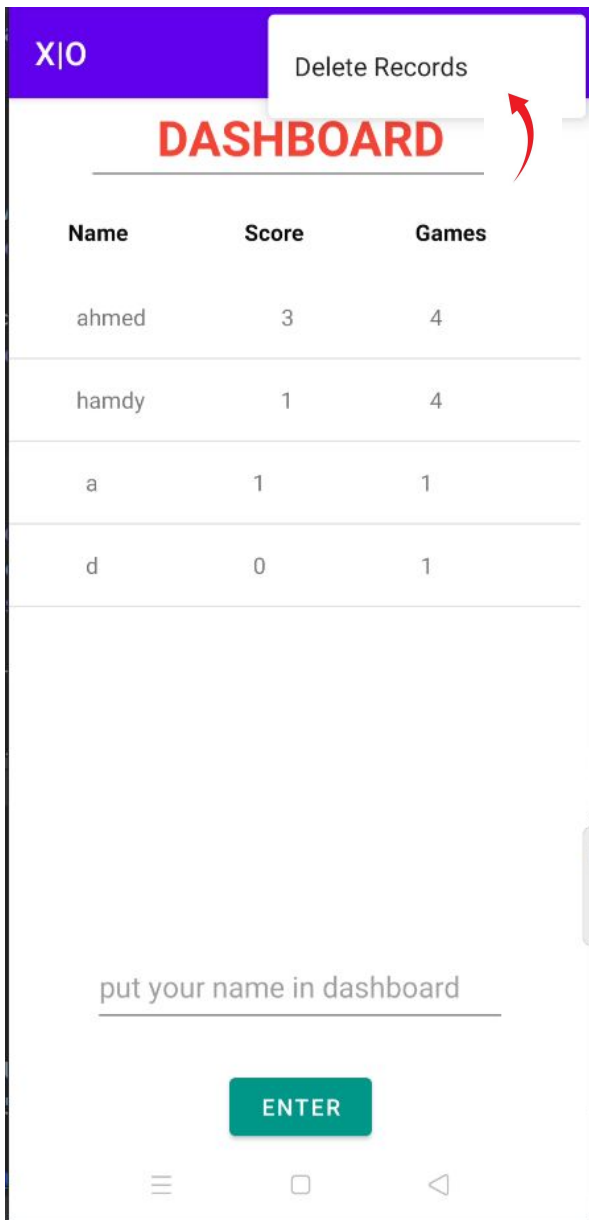

Dashboard

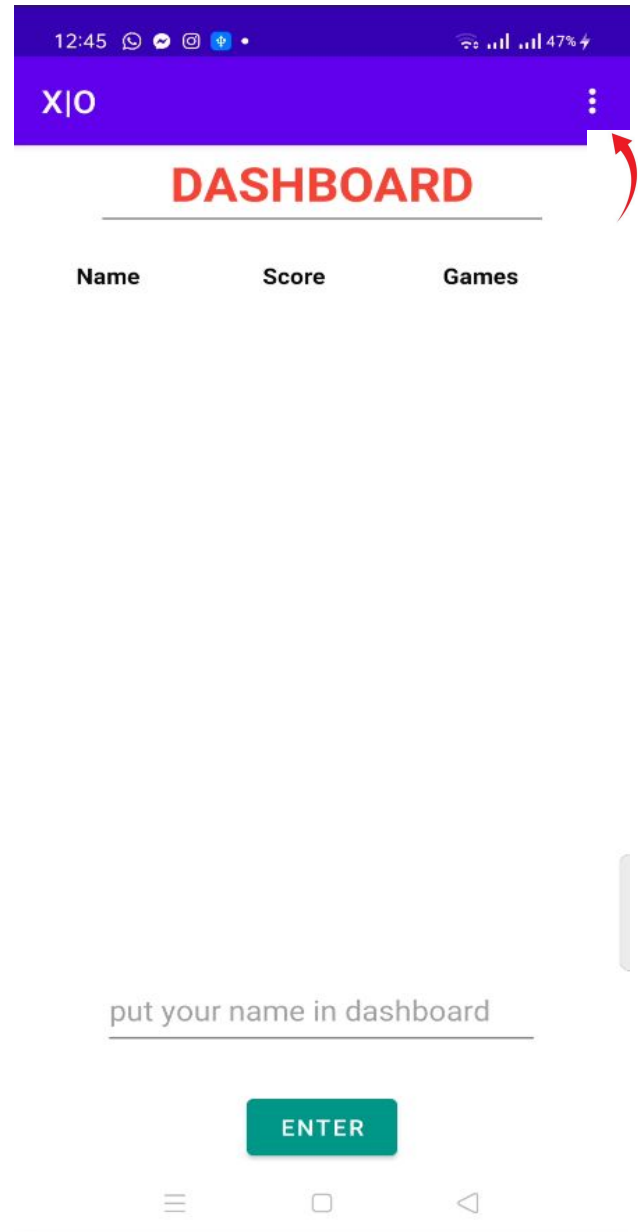

Contains players with their scores and game played

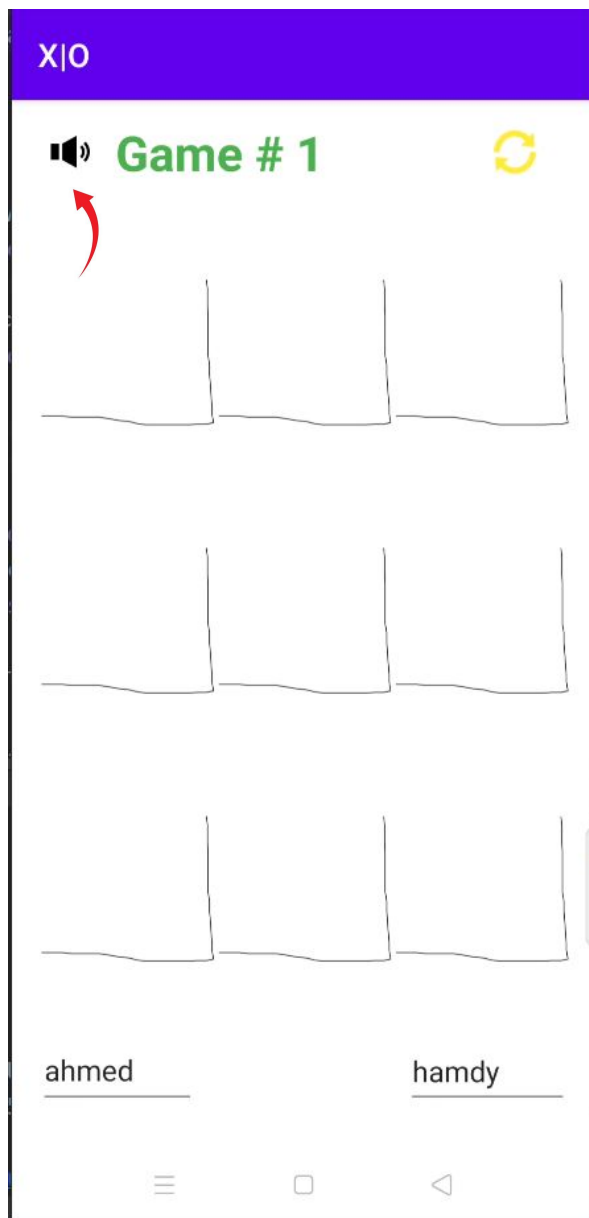

If player entered a name in the dashboard already an alert will be shown to him to choose delete this player with his score by pressing yes or continue with this player score by pressing no

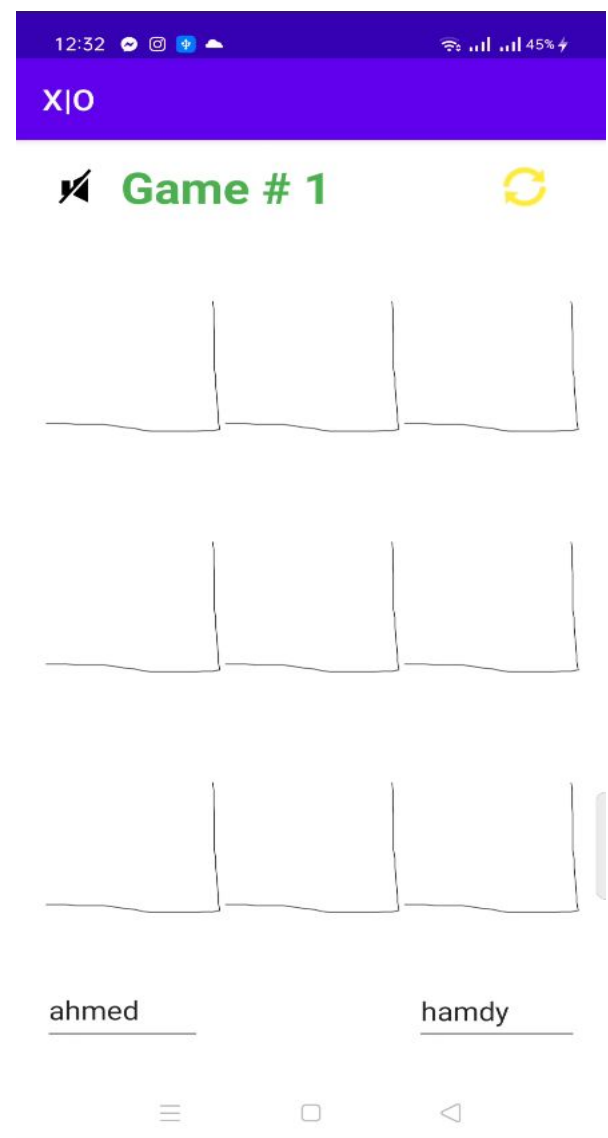

Player has another option to clear all players records from dashboard by pressing the menu option at the top right and click delete all records

Players can turn off music that pops during winning situation by press at the sound image

If player closes the game and enters again his option will be stored and if he turns sound off it will be off.

Thank You
